CAPS Curriculum

Futurekids has launched its newly developed Future-FunCAPS curriculum with lots of CAPS assistance for both class teachers and IT teachers. Our two legged approach ensures that all CAPS deliverables can be met while focussing on the needs of the 21st Century learner.

Starting with grades 1 to 3 in 2013, it covers all the topics and themes under Language, Maths and Life skills. It provides enriched CAPS classroom content with emphasis on interactive devices such as interactive whiteboards, laptops and tablets, and includes video clips, songs, PowerPoint presentations, interactive activities, as well as ICT Skills integrated into different subject topics. Templates and multimedia samples are available in English and Afrikaans attached to the E-publication per topic.

In grades 4 – 6 the Future-FunCAPS covers the Personal Well Being aspect of Life Skills, with additional enriched content for Maths.

Future-FunCAPS will ease the implementation of CAPS and strengthen the hand of the educator by adding quantitative value to the CAPS curriculum, quality lesson plans, resources to the teacher and peace of mind to all principals.

Welcome to our Future-Fun CAPS Friends

Please feel free to contact Head office at (018 771 5777) or email us for more information (info@skillspro.co.za).
